

CONCRETE DESTROYER

Triple Action
 • Penetrates • Dissolves
 • Rinses Away Concrete

Available in 32-oz. Spray Bottles,
 1 gallon bottles, 5-gallon jugs, 55 gallon
 drums and 270 gallon totes

***No More Jackhammering and Scraping!
 Concrete Destroyer Cleans and Removes
 Dry, Hardened Concrete Off Practically
 Anything without the Hazard of Acids!***

100%

BIODEGRADABLE!

***Keep Your Equipment Clean!
 Use Concrete Destroyer on:***

- Green Concrete Saws • Trowels • Bull floats • Darbys
- Screeds • Blades • Float shoes/pans • Rakes
- Buggies • Forms • Mixers • Post tension rods
- Hardware • ReadyMix trucks, and more!

How to Use Concrete Destroyer:

- Product comes ready to use - no mixing required.
- Apply product at full strength with a pump sprayer or brush or submerge the parts/trowels to be cleaned in a 5 gallon bucket of Concrete Destroyer.
- Allow CONCRETE DESTROYER to penetrate area for 5 to 10 minutes. A fizzing action ensures the product is working. When the fizzing subsides the product has completed its cycle and the parts are ready to be rinsed with a high pressure water hose.

CONCRETE DESTROYER IN ACTION

Before

Concrete saw with buildup of dried concrete slurry residue prior to spray application of CONCRETE DESTROYER. Concrete has been dried on for several months.

CONCRETE DESTROYER penetrates and attacks the portland cement causing fizzing and foaming action. Concrete dissolves and loosens from saw.

After

Clean concrete saw after being rinsed with high pressure garden water hose. **8 minutes time elapse from start to finish.**

CONCRETE DESTROYER:

- CONCRETE DESTROYER utilizes state of the art surfactant technology and small molecular size to penetrate deep inside concrete residues and react from within.
- Through this technology CONCRETE DESTROYER attacks the Portland cement and softens it to a mush. This softened mushy material will release from the surface so it can be washed away with water.
- Environmentally friendly and 100% biodegradable! Uses organic salts and surfactants!
- No toxic fumes! Works without harmful chemicals and acids. Does not contain muriatic, sulfuric, phosphoric, hydrofluoric or hydrochloric acids. Concrete Destroyer is VOC compliant.
- Is less corrosive so it can be used on most metal, painted and plastic surfaces.

CONCRETE DESTROYER Description	Standard Formula Part No.	Foaming Formula Part No.
32-oz. spray bottle*	100316	100335
1 gallon bottle**	100317	100336
5 gallon bucket	100318	100337
55 gallon drum	100319	100338

* Packaged 2 boxes of 6 32-oz bottles (12 total per case) ** Packaged 4 one gallon bottles per case
 270 Gallon tote size is also available. Call for more information.
