SDMS48
48 pcs Drive Set

Extended Torsion Zone

Absorbs torque peaks to reduce breakage, and also comes with high-visibility sleeves for greater user convenience

Improved Visibility of Bits

The silver sleeve on the bit is designed for better visibility, in the toolbox or on the ground. Laser markings on the bit clearly identify bit type and are easier to read than stamped scripts.

Long Flute

For most effective removal and universal drilling - in a variety of drills, including 1/4" hex drills. The cooling shield coating provides less friction and thus less generated heat. Impact-rated shanks ideal for tough construction.

Hex Shank & No Skate Tip

Works in both drill drivers and impact drivers. No Skate tip helps reduce bit walking and eliminate the need for a center punch for clean & accurate starts.

BUILD THE SET YOU WANT

1 CHOOSE PRE-FILLED OR EMPTY CASE

2 CHOOSE DESIRED CLIPS

3 INSERT AND SWAP CLIPS

Easily Accessible

The Custom Case System is designed to be the most straightforward approach to bit organization. The tilt-in/tilt-out mechanism makes it easier to get the bits in and out of the clip.

Durable and Secure

The case features rubber bumpers to make it more durable. It features a secure latch clip to ensure that the case is closed. It's built to stand up to the toughest jobsite conditions.

Customizable Convenience

This innovative bit system allows you to customize configurations, providing flexibility, efficiency and quick access. Take only the bits needed for a job, instead of the whole tackle box.

Best Case for the Best Bits

The Impact Tough™ driver bits include an Xtended Torsion Zone, which absorbs torque peaks to reduce breakage. The Impact Tough™ drill bits provide impact-rated shanks and tough construction.
