Expanded Glo Stix/Fish Stix Kit Offering

Greenlee has expanded its kit offering with a new compact 540-8M Mini Glo Stix Kit with (5) 20" long 3/16" Glo Stix sections, bullet and "J" hook nose tips. Greenlee's second new kit offering is the 540-20P Professional Installer's Kit featuring 20' reach and including: (3) 4' long 1/4" Fish Stix, (2) 2' long 3/16" Glo Stix and (1) 4' long 5/32" Glo Stix along with whisk, "J" hook and bullet nose tips.

Greenlee's Glo Stix are manufactured from luminescent 3/16" or 5/32" diameter fiberglass rods that glow in the dark. The Glo Stix make installation of electrical, voice, data, video, and security wires easier in dark spaces. The 3/16" and 5/32" diameter are more flexible for going around corners in tight places.

Greenlee Fish Stix are manufactured from green 1/4" diameter fiberglass rods. The 1/4" diameter Fish Stix are relatively stiff to span longer unsupported distances.

All of the rods have sturdy steel threaded connectors on each end. The threads are the same on all rods, so different diameter rod sections can be combined easily for specific situations. Each Fish Stix and Glo Stix kit includes a bullet nose tip for pushing through insulated walls, under floors or above ceilings, and includes a hook tip for hooking wires and pulling them into position. Check out Greenlee's full line of Glo Stix and Fish Stix - made for the job at hand.

Features

GLO STIX

- Glo Stix are made from luminescent fiberglass for better visibility in dark locations.
- The 3/16" diameter Glo Stix are more flexible (4-1/4" minimum bend radius) for reaching shorter unsupported distances and use around corners.
- The 5/32" Glo Stix are the most flexible (3-1/2" minimum bend radius) and are best for working around corners, in walls, etc.
- Clear non-metallic storage tubes keep the Glo Stix "charged".
- Sturdy steel threaded connectors allow interchangeability of different size Fish Stix and Glo Stix (The 540-6 is a single stick with a fixed bullet nose on both ends.)
- 200 lbs. maximum pulling strength.
- Optional whisk nose tip available for fishing over obstacles, guiding extended Stix sideways by rolling, and providing a tip that can be snagged from the opposite direction with another Fish Stix or Glo Stix (using the hook nose). Included in new 540-20P kit.

FISH STIX

- Fish Stix are made from green fiberglass.
- The 1/4" diameter Fish Stix are relatively stiff (6-1/2" minimum bend radius) and are best suited for reaching long unsupported distances.
- Sturdy steel threaded connectors allow Interchangeability of different size Fish Stix and Glo Stix.
- 200 lbs. maximum pulling strength.
- Optional whisk nose tip available for fishing over obstacles, guiding extended Stix sideways by rolling, and providing a tip that can be snagged from the opposite direction with another Fish Stix or Glo Stix (using the hook nose). Included in new 540-20P kit.
