## 2. Hazard(s) Identification

### Emergency Overview

NOTE: Under normal conditions of battery use, internal components will not present a health hazard. The following information is provided for battery acid and lead exposure that may occur during battery production or container breakage or under extreme heat conditions such as fire.

In case of rupture:

Corrosive

The product causes burns of eyes, skin and mucous membranes

**Appearance:** No information available.

**Physical State:** Solid.

**Odor:** Odorless

### ● Classification of the chemical

| Chemical Name | CAS-No    | Weight % |
|---------------|-----------|----------|
| Lead          | 7439-92-1 | 65~75    |
| Sulfuric acid | 7664-93-9 | 10~20    |
| ABS resin     | 9003-56-9 | ~5       |
| Tin           | 7440-31-5 | <0.5     |
| Calcium       | 7440-70-2 | <0.1     |

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

#### ● Physical Data

Battery is considered as sealed non-spillable one. Under normal operating conditions, the materials sealed inside should not be hazardous to people's health. Only when these materials exposed during production or under case broken condition or being extremely heated (fired), they may be hazardous to people's health.

#### ● Routes of Entry:

**Sulfuric Acid:** Harmful by all routes of entry.

**Lead Compounds:** Hazardous Exposure can occur only when product is heated, oxidized, or otherwise processed or damaged to create dust, vapor or fume.

|                                |                                                                                                                                                                                                                                                         |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Advice</b>          | First aid is upon rupture of sealed battery.                                                                                                                                                                                                            |
| <b>Eye Contact</b>             | Sulfuric Acid:<br>Immediate medical attention is required. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Keep eye wide open while rinsing. Do not rub affected area. consult physician.                      |
| <b>Skin Contact</b>            | Sulfuric Acid:<br>Immediate medical attention is required. Wash off immediately with soap and plenty of water removing all contaminated clothes and shoes.                                                                                              |
|                                | Lead:<br>Wash immediately with soap and water.                                                                                                                                                                                                          |
| <b>Inhalation</b>              | Sulfuric Acid:<br>Move to fresh air. Call a physician or Poison Control Center immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.                                                                      |
| <b>Ingestion</b>               | Sulfuric Acid:<br>Immediate medical attention is required. Call a physician or Poison Control Center immediately. Do NOT induce vomiting. Drink plenty of water. Never give anything by mouth to an unconscious person. Remove from exposure, lie down. |
|                                | Lead Compounds:<br>May cause abdominal pain, nausea, vomiting, diarrhea, and severe cramping. Acute ingestion should be treated by a physician.                                                                                                         |
| <b>Notes to Physician</b>      | Treat symptomatically.                                                                                                                                                                                                                                  |
| <b>Protection of First-aid</b> | Use personal protective equipment. Avoid contact with skin, eyes and clothing.                                                                                                                                                                          |

## 5. FIRE-FIGHTING MEASURES

|                                                        |                                                                                                                                                                                                    |
|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Flammable Properties</b>                            | Not flammable.                                                                                                                                                                                     |
| <b>Flash Point</b>                                     | Not determined.                                                                                                                                                                                    |
| <b>Suitable Extinguishing Media</b>                    | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.                                                                                            |
| <b>Uniform Fire Code</b>                               | Corrosive: Acid-Liquid                                                                                                                                                                             |
| <b>Hazardous Combustion Products</b>                   | Hazardous metal fumes and oxides.                                                                                                                                                                  |
| <b>Explosion Data Sensitivity to Mechanical Impact</b> | No.                                                                                                                                                                                                |
| <b>Sensitivity to Static Discharge</b>                 | No.                                                                                                                                                                                                |
| <b>Specific Hazards Arising from the Chemical</b>      | The product causes burns of eyes, skin and mucous membranes. Thermal decomposition can lead to release of irritating gases and vapors. In the event of fire and/or explosion do not breathe fumes. |

### Protective Equipment and Precautions for Firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Physical and Chemical Hazards

## 6. ACCIDENTAL RELEASE MEASURES

|                                  |                                                                                                                                                                                                                   |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Personal Precautions</b>      | Use personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Do not get in eyes, on skin, or on clothing.                               |
| <b>Environmental Precautions</b> | Refer to protective measures listed in Sections 7 and 8.                                                                                                                                                          |
| <b>Methods for Containment</b>   | Prevent further leakage or spillage if safe to do so.                                                                                                                                                             |
| <b>Methods for Cleaning Up</b>   | In case of rupture: Use personal protective equipment. Dam up. Soak up with inert absorbent material. Take up mechanically and collect in suitable container for disposal. Clean contaminated surface thoroughly. |
| <b>Other Information</b>         | Refer to protective measures listed in Sections 7 and 8.                                                                                                                                                          |

## 7. HANDLING AND STORAGE

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautions to be Taken in Handling and Storage | Keep away from flames during and immediately after charging. Combustion or overcharging may create or liberate toxic and hazardous gases and liquids including hydrogen, sulfuric acid mist, sulfur dioxide, sulfur trioxide, stibine, arsine and sulfuric acid. Store batteries in cool, dry, well-ventilated area. Do not short circuit battery terminals, or remove vent caps during storage or recharging. Protect battery from physical damage. |
| Other Precautions                               | GOOD PERSONAL HYGIENE AND WORK PRACTICES ARE MANDATORY. Refrain from eating, drinking or smoking in work areas. Thoroughly wash hands, face, neck, and arms before eating, drinking or smoking. Launder soiled clothing before reuse. Emptied batteries contain hazardous sulfuric acid residue.                                                                                                                                                     |

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

### ● Exposure Guidelines

## 10. STABILITY AND REACTIVITY

|                                         |                                                                               |
|-----------------------------------------|-------------------------------------------------------------------------------|
| <b>Stability</b>                        | Stable under recommended storage conditions.                                  |
| <b>Incompatible Products</b>            | Incompatible with strong acids and bases. Incompatible with oxidizing agents. |
| <b>Conditions to Avoid</b>              | Exposure to air or moisture over prolonged periods.                           |
| <b>Hazardous Decomposition Products</b> | Thermal decomposition can lead to release of toxic/corrosive gases and vapors |
| <b>Hazardous Polymerization</b>         | Hazardous polymerization does not occur.                                      |

## 11. TOXICOLOGICAL INFORMATION

**GENERAL:** The primary routes of exposure to lead are ingestion or inhalation of dust and fumes.

### ACUTE:

**INGESTION/INHALATION:** Exposure to lead and its compounds may cause headache, nausea, vomiting, abdominal spasms, fatigue, sleep disturbances, weight loss, anemia, and pain in the legs, arms and joints. Kidney damage, as well as anemia, can occur from acute exposure.

### CHRONIC:

**INHALATION/INGESTION:** Prolonged exposure to lead and its compounds may produce many of the symptoms of short-term exposure and may also cause central nervous system damage, gastrointestinal disturbances, anemia, and wrist drop. Symptoms of central nervous system damage include fatigue, headaches, tremors, hypertension, hallucinations, convulsions and delirium. Kidney dysfunction and possible injury has also been associated with chronic lead poisoning. Chronic over-exposure to lead has been implicated as a causative agent for the impairment of male and female reproductive capacity, but there is, at present, no substantiation of the implication. Pregnant women should be protected from excessive exposure. Lead can cross the placental barrier and unborn children may suffer neurological damage or developmental problems due to excessive lead exposure in pregnant women.

- **Acute Toxicity**

**Product Information** Product does not present an acute toxicity hazard based on known or supplied information.

**Irritation** Causes severe irritation and or burns

Component Information

| Chemical Name | LD50 Oral            | LD50 Dermal | LC50 Inhalation        |
|---------------|----------------------|-------------|------------------------|
| Sulfuric acid | = 2140 mg/kg ( Rat ) | -           | = 510 mg/m3( Rat ) 2 h |

- **Chronic Toxicity**

|                         |                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Chronic Toxicity</b> | Lead compounds may be absorbed by ingestion, by inhalation and through the skin. Lead may damage kidney function, the blood forming system and the reproductive system. Avoid repeated exposure. |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- **Carcinogenicity:** The table below indicates whether each agency has listed any ingredient as a carcinogen.

| Chemical Name | ACGIH | IARC     | NTP                    | OSHA |
|---------------|-------|----------|------------------------|------|
| Lead          | A3    | Group 2A | Reasonably Anticipated | X    |
| Sulfuric acid | A2    | Group 1  | Known                  | X    |
| ABS resin     |       | Group 3  |                        |      |

**ACGIH: (American Conference of Governmental Industrial Hygienists)**

A2 - Suspected Human Carcinogen

A3 - Animal Carcinogen

**IARC: (International Agency for Research on Cancer)**

Group 1 - Carcinogenic to Humans

Group 2A - Probably Carcinogenic to Humans

**NTP: (National Toxicity Program)**

Known - Known Carcinogen

Reasonably Anticipated - Reasonably Anticipated to be a Human Carcinogen

**OSHA: (Occupational Safety & Health Administration)**

X - Present

|                               |                                                                                                                          |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Reproductive Toxicity</b>  | Product is or contains a chemical which is a known or suspected reproductive hazard.                                     |
| <b>Developmental Toxicity</b> | Contains ingredients that have suspected developmental hazards. Inorganic lead compounds can cause developmental damage. |
| <b>Target Organ Effects</b>   | None known.                                                                                                              |

## 12. ECOLOGICAL INFORMATION

- **Ecotoxicity**

The environmental impact of this product has not been fully investigated.

### 13. DISPOSAL CONSIDERATIONS

In most surface water and groundwater, lead forms compounds with anions such as hydroxides, carbonates, sulfates, and phosphates and precipitates out of the water column. Lead may occur as sorbed ions or surface coatings on sediment mineral particles or may be carried in colloidal particles in surface water. Most lead is strongly retained in soil, resulting in little mobility. Lead may be immobilized by ion exchange with hydrous oxides or clays or by chelation with humic or fulvic acids in the soil. Lead (when in the dissolved phase) is bioaccumulated by plants and animals, both aquatic and terrestrial.

|                               |                                                                                                                                              |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Waste Disposal Methods</b> | This material, as supplied, is a hazardous waste according to federal regulations (40 CFR 261). Should not be released into the environment. |
| Contaminated Packaging        | Do not re-use empty containers.                                                                                                              |
| US EPA Waste Number           | D002 D008                                                                                                                                    |

### 14. TRANSPORT INFORMATION

- **Proper Shipping Name**

UN2800 — Batteries, wet, Non- Spillable, and electric storage  
Batteries, dry, Non-Spillable, and dry storage

- **North America Ground and Air Shipment**

Our non-spillable lead acid batteries are under the U.S. Department of Transportation's (DOT) hazardous materials regulations but are exempted from these regulations since they meet all of the following requirements found at 49 CFR 173.159(d) – NMFC # 60680 Class 65.

- When offered for transport, the batteries are protected against short circuits and securely packaged as required by 49 CFR 173.159(d) (1);
- The batteries and outer packaging are marked with the words NONSPILLABLE BATTERY as required by 49 CFR 173.159(d) (2);

The batteries comply with the vibration and pressure differential tests found in 49 CFR 173.159(d) (3) and “crack test” found at 49 CFR 173.159(d) (4).

#### ● International Shipments

Our non-spillable lead acid batteries also are **excepted** from the international hazardous materials (also known as “dangerous goods”) regulations since they comply with the following requirements:

- The vibration and pressure differential tests found in Packing Instruction 806 and Special Provision A67 of the **International Air Transport Association (IATA) Dangerous Goods Regulations**;

The vibration and pressure differential tests found in Packing Instruction 806 and Special Provision A67 of the **International Civil Aviation Organization (ICAO)** Technical Instructions for the Safe Transport of Dangerous Goods by Air;

- The vibration, pressure differential, and “crack” tests found in Special Provision 238.1 and 238.2 of the **International Maritime Dangerous Goods (IMDG) Code**.

#### SARA 313

Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) . This product contains a chemical or chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372:

| Chemical Name | CAS-No    | Weight % | SARA 313 - Threshold Values % |
|---------------|-----------|----------|-------------------------------|
| Lead          | 7439-92-1 | 65~75    | 0.1                           |
| Sulfuric acid | 7664-93-9 | 10~20    | 1.0                           |

|                                                           |     |
|-----------------------------------------------------------|-----|
| <b>SARA 311/312 Hazard Categories Acute Health Hazard</b> | Yes |
|-----------------------------------------------------------|-----|

|                                          |     |
|------------------------------------------|-----|
| <b>Chronic Health Hazard</b>             | Yes |
| <b>Fire Hazard</b>                       | No  |
| <b>Sudden Release of Pressure Hazard</b> | No  |
| <b>Reactive Hazard</b>                   | No  |

#### **Clean Water Act**

This product contains the following substances which are regulated pollutants pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42):

| <b>Chemical Name</b> | <b>CWA - Reportable Quantities</b> | <b>CWA - Toxic Pollutants</b> | <b>CWA - Priority Pollutants</b> | <b>CWA - Hazardous Substances</b> |
|----------------------|------------------------------------|-------------------------------|----------------------------------|-----------------------------------|
| Lead                 |                                    | X                             | X                                |                                   |
| Sulfuric acid        | 1000 lb                            |                               |                                  | X                                 |

#### **Clean Air Act, Section 112 Hazardous Air Pollutants (HAPs) (see 40 CFR 61)**

This product contains the following substances which are listed hazardous air pollutants (HAPS) under Section 112 of the Clean Air Act:

| <b>Chemical Name</b> | <b>CAS-No</b> | <b>Weight %</b> | <b>HAPS data</b> | <b>VOC Chemicals</b> | <b>Class 1 Ozone Depleters</b> | <b>Class 2 Ozone Depleters</b> |
|----------------------|---------------|-----------------|------------------|----------------------|--------------------------------|--------------------------------|
| Lead                 | 7439-92-1     | 65~75           |                  |                      |                                |                                |

#### **CERCLA**

This material, as supplied, contains one or more substances regulated as a hazardous substance under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 CFR 302):

| <b>Chemical Name</b> | <b>Hazardous Substances RQs</b> | <b>Extremely Hazardous Substances RQs</b> |
|----------------------|---------------------------------|-------------------------------------------|
| Lead                 | 10 lb                           |                                           |
| Sulfuric acid        | 1000 lb                         | 1000 lb                                   |

#### **U.S. State Regulations**

##### **California Proposition 65**

This product contains the following Proposition 65 chemicals:

| <b>Chemical Name</b> | <b>CAS-No</b> | <b>California Prop. 65</b>                                           |
|----------------------|---------------|----------------------------------------------------------------------|
| Lead                 | 7439-92-1     | Carcinogen Developmental<br>Female Reproductive Male<br>Reproductive |
| Sulfuric acid        | 7664-93-9     | Carcinogen                                                           |

##### **U.S. State Right-to-Know Regulations**

| <b>Chemical Name</b> | <b>Massachusetts</b> | <b>New Jersey</b> | <b>Pennsylvania</b> | <b>Illinois</b> | <b>Rhode Island</b> |
|----------------------|----------------------|-------------------|---------------------|-----------------|---------------------|
| Lead                 | X                    | X                 | X                   | X               | X                   |
| Tin                  | X                    | X                 | X                   |                 |                     |
| Calcium              | X                    | X                 | X                   |                 |                     |
| Sulfuric acid        | X                    | X                 | X                   | X               | X                   |

##### **International Regulations**

##### **Mexico - Grade**

Minimum risk, Grade 0

| Chemical Name | Carcinogen Status | Exposure Limits                          |
|---------------|-------------------|------------------------------------------|
| Lead          | A3                | Mexico: TWA= 0.15 mg/m3                  |
| Tin           |                   | Mexico: TWA 2 mg/m3 Mexico: STEL 4 mg/m3 |
| Sulfuric acid | A2                | Mexico: TWA 1 mg/m3                      |

#### Canada

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

#### WHMIS Hazard Class

D2A Very toxic materials E Corrosive material

| Chemical Name | NPRI |
|---------------|------|
| Lead          | X    |
| Sulfuric acid | X    |
